

## INFINITY JET Precision Redefined

Introducing Infinity Jet Cut, a high-performance abrasive specially designed for water jet cutting applications. Engineered with precision and consistency, Infinity Jet Cut ensures superior cutting efficiency, smooth edge quality, and enhanced durability for a wide range of materials, including metal, glass, stone, ceramics, and composites.

### Key Features:

- ❖ *Optimized Grain Size & Hardness – Ensures sharp, clean cuts with minimal waste.*
- ❖ *High Purity & Low Dust – Provides a consistent flow for uninterrupted cutting performance.*
- ❖ *Versatile Application – Suitable for industrial, automotive, aerospace, and architectural cutting needs.*
- ❖ *Cost-Effective & Efficient – Maximizes productivity while reducing material consumption.*

Designed to meet the highest industry standards, Infinity Jet Cut delivers precision, power, and performance—setting a new benchmark in water jet cutting abrasives.
